

# MEET BRIJJIT

Hi.

Applied immediately upon closure, Brijjit reduces tension to help facilitate better healing.

- Used for wound closure or wound support.
- Can reapply routinely for longer term tension relief to support scar minimization.

“

We now won't do a mastopexy without it.

M. Bradley Calobrace, MD, FACS

SKIN HEALING IS  
COMPLICATED.

Mechanical forces, primarily TENSION, can significantly impact scar appearance.

**BRIJJIT RELIEVES  
THE TENSION.**
